

Fullbrook 6 Students Achieve “better than they ever thought they could ” in their A level Examinations.

A level students at Fullbrook School have once again achieved a fantastic set of results.

Evidently responding to the school mission to “be better than you ever thought you could be”, a number of students have exceeded expectations: Max Wilford, studying Maths, Further Maths and Physics has outperformed his 3Bs target by achieving 2 A*s and a B at A level. Kira Burton, studying Chemistry, Physics, Maths and Further Maths has successfully outperformed her A, A, A, A* targets by achieving A*,A*, A*, A* at A level – a frankly awesome achievement.

Mrs Moore, the school’s Principal commented that “We strive to ensure that every student can surpass their expectations. Students have shown this year that they have benefitted from this approach. They have used all their experiences to support their learning which has led to an excellent set of results.”

Once again, there was a 99% pass rate at A level, with nearly 40% of all grades at A*-B.

Fullbrook School will continue to follow the aspirations and progress of the year group with interest. Our expectations for their success in the future are very high.
